

How do you create a socialist country? (But why would you ever want to?)

Here are the eight steps.

- 1) Education - Take control of what people read and listen to and what children learn in school.
- 2) Welfare - Take control of every aspect of people's lives (food, housing, income) because that will make them fully dependent on the government.
- 3) Class Warfare - Divide the people into the wealthy and the poor. Eliminate the middle class, which will cause more discontent and make it easier to tax the wealthy with the support of the poor.
- 4) Poverty - Increase the poverty level as high as possible. Poor people are easier to control and will not fight back if you are providing everything for them.
- 5) Debt - Increase the government's debt to an unsustainable level. The government will be able to increase taxes, which will produce more poverty.
- 6) Gun Control - Remove the people's ability to defend themselves from the government. This is an important step in the government's ability to create a police state.
- 7) Religion - Remove the belief in God from the government and schools, because people need to believe that only the government can know what is best for them.
- 8) Healthcare - Control healthcare and you control the people.

Do these steps sound familiar? They should - - this is the agenda of the Democratic Socialist Party of America.
